

Network Monitoring: Identifying and Measuring the Threat
held at Crowne Plaza Surfers Paradise Hotel,
Gold Coast on 4th September, 2007

SUMMARY

This was a full day workshop and networking event being organised by the Information Infrastructure Security Hub of the RNSA Networks.

Overview of Workshop

Leading researchers and security professionals from overseas and Australia gathered at the Gold Coast for RAID – *Recent Advances in Intrusion Detection* – in September 2007. Immediately prior to RAID, with the support of the Research Network for a Security Australia (RNSA), Queensland University of Technology's Information Security Institute organised a workshop for academic, industry and government participants. The workshop featured several distinguished presenters from Europe, North America, and Australia, including:

- Mr Graham Ingram, AusCERT, Australia
- Professor John McHugh, Dalhousie University, Canada
- Professor Marc Dacier, Institut Eurecom, France
- Assistant Professor Christopher Kruegel, Technical University, Vienna, Austria
- Dr Ludovic Me, Supelec, France
- Dr Olivier De Vel, DSTO, Australia
-

The presentations provided broad coverage of the many different facets of network monitoring focussing on challenges and leading edge activities in the area of network threat monitoring.

The workshop was well attended. A total of 31 delegates attended the workshop. This consisted of:

- 7 research students
- 7 academic staff
- 18 Government and Industry delegates
